

What's New?

There are new childcare regulations being put into place from Montana state licensing that will need to be enforced by September. Classrooms sizes will now have limits and will not be based solely on the square footage of the classroom any longer.

Therefore, JJ and Jacqui have been blessed with the opportunity through their landlord to have a building built specifically for us on our current property. It will sit right next to our current building. Those of you who have been with us since our in-home facilities will understand that this time around we will not be setting a date for completion, but we are in the beginning stages of expanding.

With that being said, we want all of our families to be aware that although we will try our best to keep the outside building companies clear of our current center. The parking lot, street and surrounding areas like the alley may be occupied for equipment but all companies will understand that we are continuously in business and entry may not be blocked.

If anyone would like to see plans for our new building, we have an open-door policy and would love to show all who are interested.

We appreciate everyone's patience during this transition and we will update all families as we are updated ourselves. The expansion will help to avoid terminating any families as well as offer more openings to our growing families and other families in the community.

As always we appreciate your support during these exciting changes!
